The Commissariat of Enlightenment Ken Kalfus 2009-02-24 Russia, 1910. Leo Tolstoy lies dying in Astapovo, a remote railway station. Members of the press from around the world have descended upon this sleepy hamlet to record his passing for a public suddenly ravenous for celebrity news. They have been joined by a film company whose cinematographer, Nikolai Gribshin, is capturing the extraordinary scene and learning how to wield his camera as a political tool. At this historic moment he comes across two men -- the scientist, Professor Vorobev, and the revolutionist, Joseph Stalin -- who have radical, mysterious plans for the future. Soon they will accompany him on a long, cold march through an era of brutality and absurdity. The Commissariat of Enlightenment is a mesmerizing novel of ideas that brilliantly links the tragedy and comedy of the Russian Revolution with the global empire of images that occupies our imaginations today.

Homo stupidus Piero Calzona 2014-05-14 Siamo sicuri che Homo sia sapiens? Siamo sicuri che le religioni abbiano un'utilità per l'umanità? Per rispondere a queste due domande l'Autore ha dovuto dedicare tredici anni di ricerca serrata attraverso la lettura di circa cinquecento libri di varie discipline. L'antropologia, la paleontologia, l'etnologia, la biologia evolutiva, la microbiologia, la genetica e tante altre discipline relative all'evoluzionismo gli hanno dato le risposte che cercava. In questa ricerca storico-anthropologica l'Autore apre nuovi scenari sulla natura dell'uomo e sulle origini della religione, scenari che evidenziano le catastrofi causate dall'uomo e che ci fanno presagire un futuro incerto per la specie Homo.

In Search of a Glorious Death Carlo Mazzantini 1992 This autobiographical narrative provides an alternative perspective of World War I, recounting the experiences of a Roman schoolboy who volunteered to fight against the Allies after Italy surrendered in 1943. But he is not sent to the front. Instead, with professional soldiers from the Russian front and fanatical fascists, he fights in the civil war that raged in Mussolini's puppet state. He is captured in Milan after the German surrender and is spared execution by his captors, boys of his own age.

The Healing Power of Water Masaru Emoto 2008-09-01 This book will transform your world view. Dr. Masaru Emoto’s first book, The Hidden Message in Water, told about his discovery that crystals formed in frozen water revealed changes when specific, concentrated thoughts were directed toward them. He also found that water from clear springs and water that has been exposed to loving words showed brilliant, complex and colourful snowflake patters. In contrast, polluted water, or water exposed to negative thought formed incomplete, asymmetrical patterns with dull colors. Thee Healing Power of Water includes contributions from leading scientists such as William A. Tiller, who was featured in the film What the Bleep Do We Know!?, and from spiritual teachers such as Doreen Virtue, Starhawk, William Bloom, and Sig Lonegren.

This Economy Kills Andrea Tornielli 2015-08-17 When Pope Francis wrote in his apostolic letter The Joy of the Gospel that the economy of the West is one that “kills,” he was immediately labeled by some as a Marxist. Criticisms came fast and furious, not only from financial columnists and conservative cable personalities, but also from some Catholic commentators, especially in the United States. In *This Economy Kills*, two of the most respected journalists covering the Vatican today explore the Pope’s teaching and witness on the topic; the ways it relates to other topics like war, the environment, and family life; its connections to the teaching of his predecessors; and the criticism it has generated, especially from the direction of the United States. This fascinating book includes the full text of an extended interview the authors conducted with Francis on the topic of capitalism and social justice, appearing here in English for the first time. *This Economy Kills* is essential reading for anyone who wants to understand Pope Francis’s convictions about the world we live in and the way he believes Christians are called to shape it.

L'onda capovolta Donato Merico 2017-05-09 Esiste un modo per salvare se stessi? Per l'autore certamente sì ma solo attraverso un percorso che richiede coraggio, umiltà e, soprattutto, forza per affrontare il dolore che scaturirà da questo viaggio a ritroso nel tempo: dal ricordo emozionale della vita intrauterina sino, attraverso il trauma del parto, ai primi mesi di vita dei bambini che si è stati. Il bambino che non è stato "ascoltato" nei suoi bisogni, poiché la madre e in seguito le altre figure di riferimento non hanno potuto, voluto o saputo farlo, ne ricava una profonda frustrazione, una ferita narcisistica che lo renderà un adulto incapace di "ascoltarsi" e di comprendere le proprie sensazioni, fino a provare una sorta di "distacco da se stesso" causata di varie forme di malessere fisico, psichico o relazionale, che lo porterà a cercare qualsiasi cosa "fuori da sé", come: il ser lavoro, i doveri familiari, gli svaghi fatui, la religione, la politica, le dipendenze di vario tipo, per tenere a bada l"angoscia esistenziale".

Commentaries On Living 2 | Krishnamurti 2012-08-08 In this series of commentaries J. Krishnamurti, one of the great thinkers of our time, touches upon many human problems-our hopes, our fears, our illusions, our beliefs, our prejudices-and in the simplest language seems to pierce to their roots."The sheer simplicity is breathtaking. The reader is given, in one paragraph, often in one sentence, enough to keep him exploring, questioning, thinking for days." - Anne Morrow Lindbergh."The insight, spiritual and poetic, of these commentaries is as simply expressed as it is searching in its demand."Times Literary Supplement (London)."Krishnamurti is no other than he seems, a free man, one of the first quality, growing older as diamonds do but the gem-like flame not dating, and alive in these Commentaries. It is a treasure."-Francis Hackett, The New Republic.

The Basic Code of the Universe Massimo Citro 2011-07-26 Explains the universal information code connecting every person, plant, animal, and mineral and its applications in science, health care, and cosmic unity • Examines research on consciousness, quantum physics, animal and plant intelligence, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water • Reveals the connections between the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water DNA dictates the physical features of an organism. But what dictates how something grows—from the division of cells in a human being to the fractal patterns of a crystal? Massimo Citro reveals that behind the complex world of Nature lies a basic code, a universal information field—also known as the Akashic field, which records all that was, is, and will be—that directs not only physical development and behavior but also energetic communication and interactions among all living and non-living things. The author examines research on consciousness, quantum physics, animal and plant intelligence, the power of intention, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water. Linking the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water, Citro shows how the universal information field connects every person, plant, animal, and mineral—a concept long known by shamans and expounded by perennial wisdom. Putting this science of the invisible to practical use, he explains his revolutionary system of vibrational medicine, known as TFF, which uses the information field to obtain the benefits of natural substances and medications in their “pure” informational form, offering side-effect-free remedies for health and well-being.

Ciao! Come Stai? Giovanni Lollo 2008-07-14 Ciao, se ti fossi appena svegliato da un lunghissimo letargo e aprissi gli occhi, guardandoti allo specchio, quale sarebbe la prima domanda che ti porresti? Ti assicuro che non sarebbe: Chi è quello nello specchio? Questa sarebbe la seconda. La prima domanda che ti faresti ancora prima di guardarti nello specchio, ancora prima di formulare un pensiero sensato, sarebbe: Come sto? E' la domanda più importante che potremo mai rivolgere a noi stessi. E' la domanda che ci facciamo appena ci rendiamo conto di essere vivi. L'abbiamo espressa a noi stessi alla nascita, quando ci hanno tagliato il cordone ombelicale e la risposta che abbiamo dato allora ha determinato la vita che abbiamo vissuto finora.Ora sei di fronte ad una importante scelta, puoi rifarti la domanda con una consapevolezza nuova. Ora puoi decidere liberamente, consapevole di quanto importante sia la domanda.Ciao! Come stai?

The 5 Biological Laws and Dr. Hamer's New Medicine Andrea Taddei 2020 The German New Medicine discovered by Dr. Ryke Geerd Hamer and systematized in the 5 Biological Laws represents a change in the understanding of what is commonly called a disease. The German New Medicine is not a new method of treatment but the understanding of natural laws applicable to humans and animals. Through his studies, Dr. R.G. Hamer, came to the conclusion that the disease processes are not "errors of nature" but rather Significant Biological Programs of Nature stemming from sudden and dramatic events. This book was written with the intent of shedding light on the understanding of the 5 Biological Laws, for those looking for and wanting to understand the issue fully; the study of matter and the spirit, whether reflective, critical and scientific, is up to the reader. www.5biologicalaws.com

The First Cell Azra Raza 2019-10-15 With the fascinating scholarship of The Emperor of All Maladies and the deeply personal experience of When Breath Becomes Air, a world-class oncologist examines the current state of cancer and its devastating impact on the individuals it affects -- including herself. In The First Cell, Azra Raza offers a searing account of how both medicine and our society (mis)treats cancer, how we can do better, and why we must. A lyrical journey from hope to despair and back again, The First Cell explores cancer from every angle: medical, scientific, cultural, and personal. Indeed, Raza describes how she bore the terrible burden of being her own husband's oncologist as he succumbed to leukemia. Like When Breath Becomes Air, The First Cell is no ordinary book of medicine, but a book of wisdom and grace by an author who has devoted her life to making the unbearable easier to bear.

Chinese Acupuncture Georges Soulié de Morant 1994 Soulié de Morant's masterpiece is the most detailed study of acupuncture available in a Western language. It was nominated for a Nobel prize and provided the foundation for French acupuncture. This text is divided into 5 parts: the energetics of acupuncture, the application of the energetics, physiology, meridians and points, and treatment. This book is a unique historical document, but more than this, it is the most practical of texts and has already served a generation of clinicians well.

Medicine Upside Down Giorgio Mambretti 2013-03-01 Dr Hamer is a highly controversial figure: his patients love him, yet other doctors want to block him, and meanwhile he gathers acknowledgements, but at the same time he is put on trial as well. Many believe that most of the opposition against him is because his theories -- and above all his long list of patients who have been healed -- go completely against established medicine... How can it be that diseases like cancer can simply be an attempt of the brain to fix (which means to heal) some emotional traumas? And that identifying such traumas and solving them can equate to healing the body? This is the only book available in Italy which is really up-to-date and comprehensive, very clear and supported by some brilliant cartoons: all these qualities have turned it into a real best seller. At long last a book on Dr Hamer's new Germanic Medicine that is both really easy-to-read and comprehensive. Approach these controversial, yet fascinating theories with objectivity and open-mindedness.

The 5 Biological Laws Andrea Taddei 2013-09-02 The 5 Biological Laws discovered by Dr. Hamer, they represent a new key of reading and understanding of all the defined processes called pathological. This book, in particular, deals in a very in-depth way the conflicts regarding the inherent conflicts of devaluation of the bones, the muscles and the articulations. A somatic map of reference, with which it is possible to go back in a precise and verifiable way to the bony and muscular pains, is illustrated. Furthermore, they are explained from the point of view of the 5 Biological Laws, most common and diffuse pathologies regarding the osteo-muscular system like: the arthritis, the arthrosis, the osteoporosis, the scoliosis, the herniated disc, the fibromyalgia, the rheumatoid arthritis and the valgus big toe. The book is composed by 2 sections: a first one, from the first to the tenth chapter, illustrates and explains the 5 biological laws, their meaning and what they involve; while from the eleventh to fifteenth chapter the conflicts, concerning the tissues resulted from the mesoderm, bones, muscles and articulations, are dealt. The book does not want to supply only a "prescription pad" of the map of the muscular, bony and articular pains, but it wants to make the reader understand the reason why, how, when and for how long the pains of the muscle-skeletal apparatus last in relation to the personal background. www.5biologicalaws.com

Cancer Can Be Cured! Father Romano Zago Ofm 2008-11-01 Father Romano Zago, a Franciscan Friar and scholar, wrote the book Cancer Can Be Cured to reveal to the world an all natural Brazilian Recipe that contains the juice made from the whole leaf plant of Aloe Arborescens and honey that has been shown to rapidly restore the body's health so it heals itself of all types of cancer. The book tells how it was while administering to the poor in the shantytown of Rio Grande do Sul , Brazil that he and the provincial Father Arno Reckziegel, witnessed the healing of simple people of cancer who used this recipe. Later, when he had assignments in Israel and Italy where this aloe species grows naturally he continued to see great success in the chronically ill being cured when he recommended they use this recipe. This inspired for him to spend the next 20 years in researching the science behind this aloe species and the publication of that research in this book along with his numerous first hand anecdotes of cancer healing by those using the Brazilian juice recipe. Chapters include information on how to prepare the recipe using the three ingredients of whole leaf Aloe arborescens juice, honey and a small amount of distillate (1%); how to take the preparation; questions and answers on everything from how to pick the aloe leaves, why each of the three ingredients is important in the recipe, the types of cancer that have been cured using the recipe, other diseases and health problems the recipe has shown to be beneficial in helping the human body solve; the internationalization of the recipe on five continents; anecdotal stories of some body healings; the composition of Aloe; and Aloe and Aids. There has been much publicized scientific research and literature on the synergistic benefits of the 300 phytotherapeutic biochemical and nutrient constituents of Aloe vera to aid the body's defenses to enhance the immune system and protect against diseases. However, this is the first book to reveal the little known potency **le ali della conoscenza** simona bullano 2018-03 un libro che racconta l'esperienza vissuta dopo una pesante diagnosi, un terribile incubo che per– ha aperto le porte verso la comprensione del sistema sanitario, dell'ignoranza della medicina, la via della guarigione attraverso la comprensione delle 5 leggi biologiche riscoperte da hamer e lo studio delle personalità ^ e la malattia con l'enneagramma biologico. la guarigione sempre possibile dove c' conoscenza, che non quella che ci fanno credere, dove un sistema colossale ci tiene nell'ignoranza e soprattutto nella paura, prevenzione e diagnosi sempre pi mirate create un oceano di malati e la medicina continua a non rispondere perch ci si ammalava, una colossale presa in giro dove scorrono cifre da capogiro e il cancro sta diventando una pandemia. attraverso l'esperienza della diagnosi, della chirurgia, tutta la fatica di rinascere da un danno di una medicina che non vuole la guarigione, ma solo ad aumentare il numero dei malati e continuare a nutrirsi di terrore e veleni.
